

Double Your Disk as Windows is Running

Increase Disk Read Speeds on SSD/HDD

Supports Windows 10 and Server 2016

Works on All Windows Versions

Compresses 300% Better with LZNT1

Combines LZNT1, LZX, and XPRESS

Custom File Type Exclusions

Transparent Access to Apps and Data

Preserves System Security on All Files

Safe and Reversible Compression

"While the pre-compression estimate showed a potential space savings of about 19GB, I ended up saving about 43GB.

I am delighted with the results...we have gone from having 18% free space, which is potentially problematic, to over 37%, which is comfortable."

Jeffrey A. Mirus, Ph.D.

# ZIPmagic DriveSpace 6

*Double Your Disk with a Single Click! Ideal for Servers, SSDs, Tablets.*

ZIPmagic DriveSpace 6 **doubles your disk capacity with zero downtime**. Access to compressed data is completely transparent – all of your installed applications run normally, and all of your files remain fully accessible as if they were not compressed at all. **DriveSpace runs on all Windows versions, does not require Windows to be shut down or restarted**, and is ideal for compressing virtual or private servers; avoiding costly migrations.

## **Zero Downtime — Lightning Fast Processing**

The compression is based on **safe, time tested and proven NTFS compression technology**. If you are using **Windows 10**,

DriveSpace leverages new **XPRESS and LZX compression** to compress all your apps and data as tight as possible, while still running on a live Windows instance.

## **Ultra-High Throughput Delivers Real-World Benchmarking**

ZIPmagic DriveSpace 6 is multi-threaded and load-balanced, achieving (de)compression throughput of 500 MB/sec or more, limited only by the performance of your underlying hardware – serving as a real-world benchmark of your drives.

- ▶ **One-Click Operation** — *(Un)compress with maximum resource utilization*  
Automatically pick optimal settings for the CPU, HDD/SSD, and compression algorithm you have chosen – ensuring maximum throughput with no bottlenecks.
- ▶ **Compression Exclusions** — *Protect data integrity on mission critical servers*  
Skip compressing data files which must remain uncompressed due to performance or stability reasons, such as Microsoft SQL Server databases.
- ▶ **300% Better NTFS (LZNT1) Compression** — *Safely process an entire disk*  
Compress all of your apps and data, including those that have advanced security applied to them – without compromising system integrity or file security.
- ▶ **XPRESS and LZX Compression** — *For Windows 10 and Server 2016*  
Achieve breakthrough compression ratios, while still running on a live Windows instance without shutting down or rebooting.
- ▶ **Very Large File Support** — *For NTFS (LZNT1) and XPRESS/LZX Compression*  
Files larger than 4 GB are only compressed with LZNT1, and files larger than 32 GB are not compressed at all – guaranteeing maximum space and reliability.

ZIPmagic is the inventor of transparent, full disk compression for Microsoft Windows, and the primary innovator in the data compression industry. For more information, and a free unrestricted 30 day trial download, please visit [www.zipmagic.co](http://www.zipmagic.co).
