

Double Your Disk  
from Your Boot Menu

Increase Disk Read  
Speeds on SSD/HDD

Supports RAID Setups  
No Driver Injection

Works on Windows  
8.1 with Update 1

Attains Very High  
Compression

Combines WIMBoot  
and NTFS Technology

File and Folder  
Exclusions

Transparent Access  
to Apps and Data

Backup, Restore, and  
Cloning for Disks

Safe and Reversible  
Compression

"While the pre-compression estimate showed a potential space savings of about 19GB, I ended up saving about 43GB.

I am delighted with the results...we have gone from having 18% free space, which is potentially problematic, to over 37%, which is comfortable."

Jeffrey A. Mirus, Ph.D.

# ZIPmagic DoubleSpace 2

*Double Your Boot Disk!  
Ideal for Fixed-Storage  
Tablets, and Boot SSDs.*

ZIPmagic DoubleSpace **doubles your boot disk capacity**. Access to compressed data is completely transparent – all of your installed applications run normally, and all of your files remain fully accessible as if they were not compressed at all. **DoubleSpace runs on 32 bit and 64 bit Windows 8.1 with Update 1**, and is ideal for compressing any boot disk that you use to run Windows, such as fixed storage, non-upgradeable Tablet PCs.

## ***Superb Compression — Maximum Flexibility***

If you are looking for **the best compression to double your boot disk capacity**, DoubleSpace's proven WIMBoot technology is the answer. Your disk will grow to 200% of its capacity, on average. You will also be able to recompress your disk as you add more data to it, uncompress it if you would ever need to, or even clone your disk to another PC!

## ***The Strongest Transparent Disk Compression for Windows***

ZIPmagic DoubleSpace easily achieves compression ratios of 2.0:1 on your boot disk. Disk compression takes advantage of all your available CPU cores, for the least possible Windows downtime during processing.

- ▶ **Adjustable Compression** — *Five settings, MaxSpeed through MaxSpace*  
Work as fast as possible at the *MaxSpeed* setting, or compresses your data as small as possible at the **MaxSpace** setting.
- ▶ **Undo Disk** — *Ensure data integrity*  
Optionally use an Undo Disk while compressing your disk, protecting you against accidental data loss in the event of a power failure.
- ▶ **Folder Exclusions** — *Optimize frequently updated files*  
Keep locations that are frequently updated outside of your compressed image to save even more space, compressing them with NTFS instead of WIMBoot.
- ▶ **[Re/Un]compress, Clone** — *Maintenance tools to keep your disk in top form*  
Recompress your disk to pick up the slack from deleted/updated files. Backup, Restore, or Clone your disk to any PC – in compressed or uncompressed form.
- ▶ **One-Click Operation** — *No external USB booting, no driver injection*  
Simply restart your PC and choose ZIPmagic DoubleSpace from your boot menu to process your disk – waste no time trying to find your PC's drivers or a USB!

**ZIPmagic** is the inventor of transparent, full disk compression for Microsoft Windows, and the primary innovator in the data compression industry. For more information, and a free unrestricted 30 day trial download, please visit [www.zipmagic.co](http://www.zipmagic.co).
